Work Authorization: Open Work Permit (Canada)

Senior Frontend Engineer with 6+ years of experience building scalable, high-performance web applications using React, TypeScript, and modern frontend architectures. Proven experience owning frontend systems end-to-end, collaborating cross-functionally, and delivering business-critical products across SaaS, e-commerce, and data-driven platforms.

CORE COMPETENCIES

Frontend: React, TypeScript, JavaScript(ES6+), HTML5, CSS3, [Next.js](#), Tailwind CSS

State & Management: Redux, Context API, REST APIs, GraphQL, Firebase

UI & Architecture: Component-driven development, custom hooks, design systems, accessibility (a11y), performance optimization

Mapping & Visualization: Mapbox GL JS, GeoJSON

Testing & Tooling: Jest, React Testing Library, Git, Bitbucket, Docker, CI/CD, Android Studio

Collaboration: Agile/Scrum, technical documentation, mentoring, code reviews

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Frontend)

Genese Solution - Lalitpur, Nepal | April 2025 - December 2025

- Led end-to-end frontend architecture and delivery of Genese Once, a SaaS subscription platform supporting multiple digital services
- Designed and implemented a scalable React + Next.js + TypeScript architecture with reusable components and clear separation of concerns
- Built and refined user-facing flows, including onboarding, payments, and subscriptions, ensuring reliability and clarity
- Collaborated closely with Product, Backend, and QA teams to deliver a high-availability, mobile-first experience
- Authored technical documentation and led knowledge-sharing sessions, improving onboarding efficiency and long-term maintainability
- Leveraged AI-assisted tools to improve development efficiency while retaining full ownership of design and implementation decisions

Frontend Developer

ToggleCorp Business Solution Pvt. Ltd. - Lalitpur, Nepal | Oct 2021 - March 2025

- Designed and implemented complex geospatial visualizations using Mapbox GL JS and GeoJSON (Points, LineStrings, Polygons), enabling interactive disaster risk and exposure analysis
- Built and maintained large-scale, data-driven frontend applications used by international and enterprise users
- Led development of multiple major features, improving usability, performance, and overall user experience

- Contributed to frontend architecture decisions, including component design, state management, and rendering performance
- Implemented complex interactive interfaces and dashboards while maintaining responsiveness and scalability
- Streamlined data workflows using Firebase and Cloud Functions, improving data reliability and system stability
- Authored comprehensive documentation, reducing onboarding time and improving long-term code ownership
- Mentored junior engineers through code reviews, pairing sessions, and architectural guidance
- Collaborated directly with clients and stakeholders to ensure feature alignment with operational and business requirements
- Key Projects: The DEEP, IFRC GO, IDMC-Helix, Alert Hub, Kitab Bazar, MapSwipe App.

Frontend Developer

Kagati Tech (company of Kunyo Co) - Kathmandu, Nepal | Jan 2021 - Oct 2021

- Developed responsive e-commerce web applications using React and Next.js
- Built secure payment interfaces, handling daily production transactions
- Implemented predictable state management using Redux and Context API
- Created reusable component libraries to improve development speed and consistency

Jr. Frontend Developer

Snigdh Tech Business Solution Pvt. Ltd - Lalitpur, Nepal | Jan 2020 - Dec 2020

- Developed responsive web applications using React.js and modern JavaScript
- Built and maintained ERP and Accounting platforms for business clients
- Collaborated with backend teams to integrate RESTful APIs and improve end-to-end UX
